

## Water-related Reading List

**earthHeal Canada** reviews the water-based texts and rich media resources it encounters. This reading list and other media references offered on the web site are updated as new materials are discovered. The following books represent the findings of scientists, journalists and researchers from many disciplines and jurisdictions around the world. Collectively, this list presents an overview of water, free energy and wellness from a restorative perspective. In an effort to maintain an up-to-date list of new contributions to this theme, you are invited to submit new works you uncover as a result of your own investigation of the themes and discoveries that attract you to water.
